1. SCOPE OF THE POLICY

- 1.1 This Policy outlines the Council's approach to contributing towards the national efforts to mitigate the spread of the COVID-19 coronavirus, and protect staff, councillors, and members of the public.

2. KEY FACTS

- 2.1 The following facts are taken from the World Health Organization and central government, unless otherwise specified (in brackets). These are correct as of the date of publication.
- 2.2 The COVID-19 virus is primarily spread when one person breathes in droplets produced when an infected person coughs or sneezes usually within 2m of the infected person.
- 2.3 Infected people, with or without symptoms, may also spread the virus by touching a surface, (Harvard).
- 2.4 The virus can then remain on the surface for between a few hours or up to several days depending on conditions. The amount of infectious virus on any contaminated surface is likely to have decreased significantly by 72 hours.
- 2.5 The incubation period is estimated to range between 1-14 days, most commonly around five day.
- 2.6 Particular at-risk groups include those over 70, or anyone with the following conditions: asthma, COPD, emphysema, bronchitis, chronic heart disease, chronic kidney disease, chronic liver disease, Parkinson's, MND, MS, cerebral palsy, diabetes, spleen problems, a BMI of 40+, pregnant, or a weakened immune system as a result of medical conditions, steroid tablets or chemotherapy.
- 2.7 Whilst the illness is generally mild in children and young adults, about 1 in every 5 people who catch it require hospital care.
- 2.8 Initial symptoms include a high temperature and a new, continuous cough (NHS), and shortness of breath (CDC).
- 2.9 There is currently no evidence that food is a likely source or route of transmission for the virus (EFSA).
- 2.10 A worst-case scenario is that 80% of the population could be infect with coronavirus, with up to 20% of the workforce off sick during the peak of the epidemic (BBC).
- 2.11 Handwashing is advised as the best way to protect oneself from infections, above sanitiser gel (PHE).

3. CURRENT CENTRAL GOVERNMENT GUIDANCE (AS OF 16/03/20)

Employment

- 3.1 Follow general advice on preventing the spread of infection.
- 3.2 If a member of staff becomes unwell after travelling to a specified area (as defined at gov.uk) then specific guidance is available at gov.uk. Otherwise, normal practice should continue.
- 3.3 For contact with a suspected case in the workplace, no restrictions or special control measures are required while laboratory test results are awaited, as most cases turn out to be negative.
- 3.4 Where someone with a confirmed case of COVID-19 has recently been to the workplace, closure of the workplace is not recommended. Management should contact Public Health England for advice on cleaning areas and managing staff.
- 3.5 By law, medical evidence for sickness is not required for the first 7 days. Discretion around the need for medical evidence is advised. Statutory Sick Pay is now available from day 1.
- 3.6 There is no perceived increase in risk for handling post or freight from a specified area (detailed above).
- 3.7 All surfaces that a symptomatic infected person has come into contact with must be cleaned using disposable cloths and household detergents. All waste should be double-bagged and marked for storage until test results are received.
